YELLOW HYBRID MAIZE

CAP9-644

EARLY MEDIUM LATE

YELLOW SEMI FLINT HYBRID

CAP9-644 is a medium maturing hybrid with approximately 120-134 days to maturity. It has a moderate tolerance to Leaf Blight (H.t), Rust and most common maize diseases. CAP9-644 is not recommended in areas with a high incidence of G.L.S., unless a strict preventative spray program is adhered to.

CAP9-644 will tolerate stressful drought conditions and has a good yield potential. CAP9-644 can have up to 2-3 cobs per plant and produces good yields even under low plant populations.

- Good standability
- Dense grain
- High shelling percentage
- Good husk cover
- Semi dent kernels
- High disease tolerance
