

SOYA BEANS

FUNDACEP 65RR

FUNDACEP 65RR allows early sowing and harvesting which makes it ideal for early planting and double cropping. It has excellent yield potential.

FUNDACEP 65RR is known for high productivity, resistance to lodging and good health. It is an early cycle soya bean with a maturity group of 5.3 - 5.5. It has a low plant height and medium pod height.

It has an indeterminate growth type and is resistant to lodging.

100 grains weigh approximately 14.4 grams. It has a white flower colour and Grey pubescence with a light brown hilo colour.

- High productivity
- Good Health
- Early Cycle
- Maturity Group: 5.3 - 5.5
- Glyphosate tolerant

Varieties	65RR
Productivity	High
Resistance to lodging	Good
Plant Health	Good
Cycle	Early
Maturity Group	5.3 - 5.5
Plant Height	Low
Pod Height	Medium
Pod Height (cm)	18
Growth type	Indeterminate
Fertility	High
100-grain weight (gram)	14.4
Combined Yield Analysis (kg)	3941
Flower colour	White
Pubescence colour	Grey
Hilo colour	Light Brown
