

# CHICORY

## SPADA

### OVERVIEW

SPADA offer rapid establishment and excellent winter growth. It provides high quality feed for high stocking rates. It is possible to sow in both Autumn and in Spring.

It is useful as a hard grazing option in a rotational system. It has been seen to offer excellent weight gains. There is always the option to mix it into pasture.

SPADA has been noted to have a good protein to energy rating. It requires a minimum rainfall of 500mm and a life span of 2-3 years. It's seeding rate on dryland is 3kg/ha and on high rainfall or irrigated land 5kg/ha can be used.

- High yielding, perennial forage chicory selection
- Improved establishment vigour
- Outstanding summer productivity and quality
- Deep-rooted species enhancing mineral uptake
